Description

We have produced online and printed marketing for some of the most recognized independent schools in the UK and internationally including the Middle East. Our client list includes Charterhouse, Repton, Rugby, Uppingham School and new clients in Middle East include Kings' Dubai & Reborn Kids Education Academy, Kuwait to name just a few.

Online, our websites are renowned for making an impact. They are distinctive as they are original and have received national recognition for both design and innovation. We do not just build a school website; we help produce a digital marketing strategy that covers mobile, apps, social media, SEO and PPC.

Offline, we produce innovative printed materials that complement and support your online presence.

Brochures, prospectus packs, flyers, stationery and business cards are all in a day's work. For schools looking to refresh their brand or re-position the school we also offer a complete marketing solution that includes research, positioning, marketing strategy and branding.
