| Description |
|-------------|
|-------------|

Double First Engage provides independent and international schools' administrators, teachers and finance teams with the systems they need to improve performance.

Financial reporting, marketing success and projected admissions are all controlled. Day to day administration is simplified, with access from anywhere. Educational achievement, cohort analysis and curriculum management information is presented to keep your school ahead - and to demonstrate it with dedicated parental access alongside online teacher and pupil portals.

We have been doing this for schools since 1987, based from the UK but with support offices in Qatar and Singapore. Our software is enhanced by skilled locally-based support, training and implementation management.
