Description

2Simple has been making powerful and creative educational software for primary schools for over 15 years during which time we have won over 40 industry awards. Our head office is in the UK but 2Simple tools are used in classrooms around the world.

Our most popular program is Purple Mash, an ever growing website filled with creative tools, games and curriculum resources to support and inspire children at school and at home. Purple Mash includes 2Code which lets teachers with no prior knowledge of coding deliver engaging and challenging lessons and easily track pupil progress.

Serial Mash runs alongside Purple Mash and is a growing online library of gripping fiction books for children aged 5-11. New books are added each term, with chapters released on Mondays to keep young readers on the edge of their seats.

We also make the multi-award winning app 2Build a Profile which provides an effortless way to gather observations and a powerful tool for supporting formative assessment. It enables comprehensive progress tracking for every child across each stage of their development. Use the 2Engage Parents add-on for a one-touch solution to parental engagement in the learning process.
