Description

CHQ Group is the pioneer of VAE software for schools worldwide. The CHQ VAE (Virtual Activity Environment) facilitates, manages, monitors and reports upon students' school life outside of lessons in areas such as sport, drama, music, activities, trips & events. Our web-based solution is hosted for you in secure data centres and boasts a broad range of functionality:

- On-line sign-up to activities by students, parents and/or staff
- Assists with place allocation and conflict resolution
- Request and record parental consent for event participation
- Take registration on a tablet/phone
- Receive on-line payments for activities & events
- Send e-mails / SMS messages
- Shows who is where in real time, including bus registers

CHQ's VAE provides a holistic view of school life, integrating with and bridging the gap between your MIS and your VLE.
