Description

ISC Research currently hold details of more than 5,600 international schools teaching wholly or partly in English. Using ISC Research's online systems and offline data downloads, subscribers can map, analyse, and communicate. International schools cater for expatriates but much more importantly, the richest 5% of the non-English-speaking world. ISC Worldwide Ltd regularly visits BSME schools. The ISC Group provides data of all kinds and services ranging from data subscriptions, market research, market overviews and new school feasibility studies, to consultancy for organisations specialising in the international school market.
